

CAKES HUT

Name :
Batch Name :
Project Topic :
Date :

Buy a Cake is a portal which allows admin in developing counters to advertise and sell their cake. This would permit rural communities to make their wares available to the rest of the world. The proposed system is to develop the android app for cake store. User can buy the nearby cake available in app. An ECom App is a portal which allows admin in developing proucds to promote and sell their goods. This would permit rural communities to make their wares available to the rest of the world. The objective of this project is to create a portal which would allow product information to be updated securely using a mobile device and will allow user to buy goods from online.

Module Description:

1. Admin

Description

#####

- **Login**

In login module the admin can login to the application with the master login details. Admin can maintain the all student details.

2. Student

Description

#####

- **Register**

Student 's main function of our proposed system is registration, in order to register with the unique application details such as name; password, email, place and time are required.

- **Login**

The main activities in the application are the user login page for user. The other modules are followed by this login page. This module records only user and password of the user.

- **Search Cake**

Student once login the page, student will search the cake as needed for them from selected in search cake option.

- **Filter**

Student can search the cake using the filter option also. A filter is based on like category wise, sub category wise and price range.

- **View Cake list**

Student can view the cake list from the list section. In the cake list student can view and select the cake.

- **View cake description**

Student can view the cake and select cake as needed for them then student view or check the cake's description like cake's author, cake's name, cake's category, cake's price.

- **Add to Cart**

Add to Cart is a way to create a temporary list of items by adding them to your cart, which will keep track of the items until you leave our website. Student can export items in your cart by saving the list to a file or sending it to an email address. You can also place the items on hold or add them to your wish list.

- **Place order**

Student can select the cake and then, place to order. Admin will shipped the order for respective students. Admin will included the add shipping address or uploaded the updated shipping address.

- **My Order**

Student will check the ordered cakes or ordered products in the my order section. In there all the ordered cakes details to be stored.

- **View Shipping Status**

Student will ordered the cakes, next they can check or view the shipping status like order is taken, order is waiting for shipping, order is shipped for added location, order is shipped for respective student.
